

U.S. Senate Campaign Financing

An analysis of campaign contributions to sitting senators as of Dec. 2015.

Dave Straube

Data used in this document was downloaded from **The National Institute on Money in State Politics** which hosts the followthemoney.org web site. The query used in this analysis asked for all campaign contributions to winning U.S. senators between 2010 and 2015. Any missing senators reflect data absent from the query result.

Each senator's campaign contributions are summarized three ways:

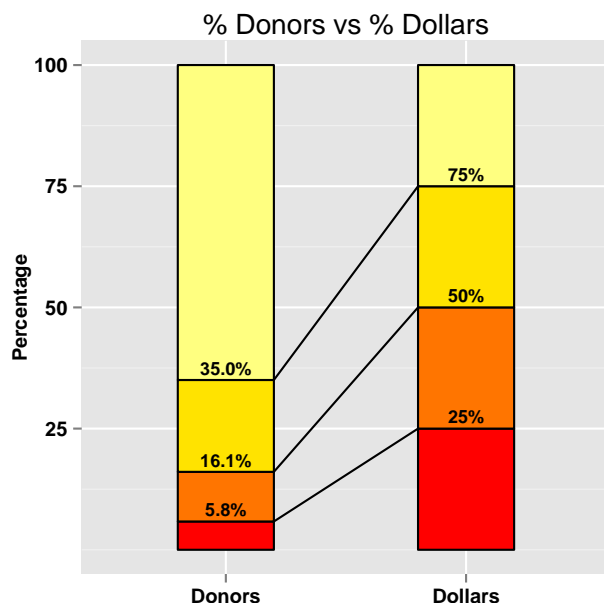

1. A graph showing what percentage of donors are responsible for 25%, 50% and 75% of contributions respectively.
2. A graph showing contributions by sector.
3. A listing of the top 25 contributors to a campaign showing both their dollar value and percent contribution.

In many cases the biggest contributor was originally listed as UNITEMIZED DONATIONS. This misrepresents the true campaign contribution landscape as it aggregates all donors under the [Federal Election Commission's](#) unitemized donation limit of \$200 into a single contributing entity. This is addressed by expanding the aggregated unitemized donations into multiple \$200 donations prior to generating the donor percentage graph.

R source files available on [GitHub](#).
